

Who is watching the roads?

*Cameras across Bayfield County photograph and log every car that passes.
From the county's own public records:*

100,721 vehicles logged in a single 30-day period, in a county of about 16,000 people

~250 agencies across five states can search the data

0 public votes were taken before the cameras went up

The contract renews this fall unless the county says no. Towns like Ashland, Verona, and Oshkosh have already dropped Flock. Bayfield can too.
